## To Whom it May Concern,

Dear Hiring Committee, I am currently a student enrolled at Lake Superior College in Duluth, MN for Computer and Web Programming (AAS) and will be graduating in Spring of 2026.

In seeing your advertisement for a Web Development intern on Handshake, I am excited to talk more about how I would be the best fit for this role. Below are some of my skills along with a strong desire to learn and build on these skillsets.

- Familiarity with HTML, CSS, PHP, Javascript/JQuery and Bootstrap
- C#, Python, and Java programming languages
- Adobe Photoshop, Illustrator and Premiere Pro skills
- WordPress and MySQL database knowledge
- Good verbal and written communication skills
- A passion for design and programming

Here is a link to my portfolio website. This website was created by me using Bootstrap, HTML, and CSS. It shows examples of PHP, MySQL, and JQuery.

I would love the opportunity to acquire real-life experience and to make a difference in the lives of individuals looking to succeed in an ever-increasing digital world. I'm passionate in providing meaningful work and excited to be able to learn under a company whose main goal is to help others.

Thank you for your consideration,  
Jessica Sufka
